NWIC INC. ACQUIRES TALK WIRELESS INC., STRENGTHENING TELECOMMUNICATIONS IN THE NIAGARA REGION

Lincoln, Ontario (October 1, 2024) – Niagara Wireless Internet Company (NWIC), a leading provider of high-speed wireless internet services across the Niagara Region, proudly announces the acquisition of Talk Wireless Inc.

Established in 1997, Talk Wireless Inc. has been a prominent provider of two-way radio solutions throughout the Niagara Region, renowned for its high-quality communication services.

Under the acquisition, Talk Wireless Inc. will continue to operate independently, maintaining the strong relationships and quality service it has built over the last 25 years. At the same time, Talk Wireless will gain access to NWIC's advanced telecommunications infrastructure and cutting-edge innovations, enhancing its offerings and positioning it for future growth.

Scott Holmes, CEO of NWIC, expressed enthusiasm about the acquisition:

"We are thrilled to welcome Talk Wireless into the NWIC family. Their long-standing reputation and expertise in two-way radio communications are a perfect complement to our innovative telecommunications solutions. Together, we are poised to provide even better services to the businesses and residents of Niagara."

Al Willick, Founder of Talk Wireless, shared his thoughts on the new partnership:

"Over the span of nearly 27 years Talk Wireless has had the unique opportunity to provide wireless voice and data solutions to a broad range of loyal clients throughout Niagara and beyond. Handing off to NWIC is the best possible fit as they are also rooted in Niagara, provide diverse solutions and have a spirit of growth and innovation. Together, the strength to meet client needs will be even greater."

This strategic acquisition reinforces NWIC's commitment to expanding its reach in the Niagara Region while offering enhanced telecommunication services across multiple platforms.

ABOUT NWIC INC.
